

Share Digitally,  
Print Physically,  
Control via API

# The System of Record for PDF Drawings

Stop drawings from going rogue.  
Control, sign, and automate every  
digital and physical copy.

## Digital Sharing

Send drawings just like always:  
via email, Teams, or SharePoint.  
Access control and audit logging  
travel with the file wherever it  
goes.

## Physical Print

Every printed copy bears a  
unique code tied to the live  
document. Anyone with a mobile  
cam or a scanner can confirm  
revision status and location. If  
the rev is obsolete? The file tells  
them to destroy it and print the  
correct one.

## Flexible API

Factify's API lets your existing  
CAD, ERP, PLM, or MES software  
integrate to create, sign, revoke,  
or track documents without  
human clicks. True system-to-  
system control.

## Your Drawings, Upgraded

**The PDF Stays.** Your engineers,  
suppliers, and partners keep  
using PDF as the interface.

### The Functionality Grows.

Factify turns that same file into a  
programmable, auditable, and  
secure source of truth.

**The Result:** No more scrap, no  
more audit panic, no more  
unauthorized forwarding, no  
more vendor overreach, no more  
IP leakage.

Factified Documents

Old PDFs

### Access Control

- |   |   |
|---|---|
| <input checked="" type="checkbox"/> Only authorized users<br>can open, forward,<br>or print | <input type="checkbox"/> Anyone can view or<br>share freely |
|---|---|

### Access can be revoked

- |   |   |
|---|---|
| <input checked="" type="checkbox"/> Instantly, via API, time<br>triggers, or manually | <input type="checkbox"/> No revocation possible |
|---|---|

### Revision control

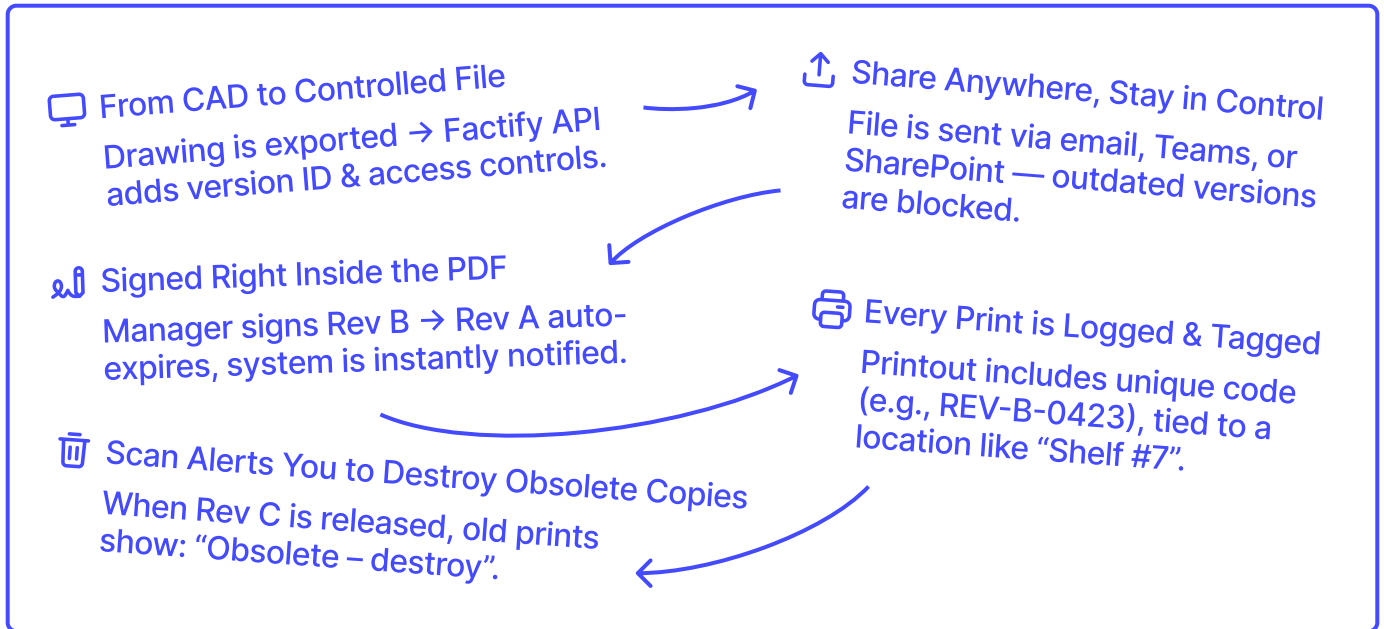

- |  |  |
|--|--|
| <input checked="" type="checkbox"/> Old versions expire and<br>auto-replaced when<br>new ones are released | <input type="checkbox"/> Obsolete revs keep<br>circulating |
|--|--|

### Printed copies are traceable

- |  |   |
|--|---|
| <input checked="" type="checkbox"/> Printing is controlled,<br>every print is uniquely<br>coded and logged | <input type="checkbox"/> No way to track or<br>control printed copies |
|--|---|

### Secure signatures are built-in

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> Sign directly in the file;<br>legally bound | <input type="checkbox"/> Requires external paid<br>tools like DocuSign |
|---|--|

Eliminate \$50,000+ scrap cost from a single outdated drawing

Audits demand traceable document control, including physical copies

Your competitors are after your IP.  
You can't afford to be the softest target.

# Five Ways Factify Transforms Your PDF Drawings

- 1 Version Integrity**  
All copies check the live master. Obsolete revs self-expire.
- 2 Built-in Sign-Off**  
No DocuSign. Executives sign inside the file. Signature is tamper-proof.
- 3 Physical Traceability**  
Every printout is tagged, logged, and verifiable.
- 4 Granular Access**  
Control open, print, and forward rights - wherever the document is.
- 5 Audit-Ready Ledger**  
Every action (open, print, sign) is timestamped, immutable.
- 6 Anonymization** Coming soon  
Anonymize or redact parts of your drawings to avoid pricing biases and ensure confidential details are safe
